This video is a fictional story set in a secondary school in modern-day Paris, documenting the day-to-day life of **four fourteen-year-olds**. There's a strong "contemporary look" and Hip Hop music.

With this video, teachers have a great resource for prompting activities of analysis and oral discussion.

The episodes present lexical, linguistic and grammatical functions which can be used as a base for practising French before, during and after watching each episode.

At the end of each episode a grammatical table sums up the lexical and linguistic/grammatical functions presented in the episode.

The ideal complement to any French course at secondary school (DELF A1/A2)

SYNOPSIS

The DVD is made up of **18 short episodes** which add up to more than **60 minutes** of film: the protagonists are four fourteen-year-olds in a Parisian secondary school who represent all the students, with their stories and their daily adventures during the academic year, and the habits and traditions of the French community.

The story also provides an opportunity to tackle the themes and problems which are relevant to all teenagers: their relationship with their parents, their free time: shopping, the school holidays and their social life, as well as the discussion of more serious themes such as pollution or their hopes for the future.

The video is set in various places (at school, at *brasserie*, at the train station, on a boat trip along the river Seine) and the themes of this story will interest the target group: secondary students from 11 to 16 years old.

Subtitles in the major European languages are expected to be added to the video. Transcriptions of all the dialogues are provided, as well as a series of didactic activities.

C'est chouette! is a high-quality video production by Autori Multimediali, supplier to international top publishers such as Pearson Education, McGraw-Hill, Il Sole 24 Ore, Corriere della Sera, De Agostini, Mondadori.
